CONTENTS

Foreword xiii
Preface xv
Dedication of the 17th Rare Earth Research Conference to the memory of Frank H. Spedding, Sam Legvold and Wallace C. Koehler xvii
K. A. Gschneidner, Jr. and J. Capellen (Ames, IA, U.S.A.)
Frank H. Spedding Award citation xxvii
Foundations of rare earth magnetism 1
A. R. Mackintosh (Copenhagen, Denmark) and H. Bjerrum Møller (Roskilde, Denmark)

1. SCIENCE AND TECHNOLOGY OF INTERMETALLICS

Intrinsic magnetic properties of compounds with the $Nd_2Fe_{14}B$ structure 21
J. M. D. Coey (Dublin, Ireland)
Substituent effects in $Nd_2Fe_{14}B$-based alloys interpreted on a crystal field model 35
E. B. Boltich and W. E. Wallace (Pittsburgh, PA, U.S.A.)
Magnetism of $R_2Fe_{14}B$-based systems 41
A. T. Pedziwiatr and W. E. Wallace (Pittsburgh, PA, U.S.A.)
Long-range incommensurate magnetic order in Dy–Y multilayers 53
J. J. Rhyne, R. W. Erwin (Gaithersburg, MD, U.S.A.), M. B. Salmon, S. Sinha, J. Borchers, J. F. Cunningham and C. P. Flynn (Urbana, IL, U.S.A.)
Determination of the alloyed amount of cerium and microdistribution of cerium in steel, cast iron and aluminium by radioassay and autoradiography 63
Q. Han, W. Zhong and C. Huo (Beijing, China)
Physicochemical characteristics of rare earth elements in ironmaking and steelmaking . . . 73
Q. Han (Beijing, China)
Hydrogen separation using $LaNi_5$ films 83
H. Sakaguchi, H. Nagai, G. Adachi and J. Shiokawa (Osaka, Japan)
Magnetic behaviour and activity of Pt–Ho catalysts supported on γ-Al_2O_3 89
L. Fengyi, L. Liangtan, L. Leitao, L. Weiqi and Y. Qunging (Jiangxi, China)
Rare-earth–transition-metal–boron permanent magnets with smaller temperature coefficients 95
L. Wei, J. Long, W. Dewen, S. Tianduo and Z. Jinghan (Beijing, China)
The role of the lanthanides in applied catalysis 101
B. T. Kilbourn (White Plains, NY, U.S.A.)
Microstructural studies of ternary rare-earth–iron alloys 107
J. S. Abell (Birmingham, U.K.) and D. G. Lord (Salford, U.K.)
Thermal conductivity of $La_{3-x}Te_4$ 113
A. Lockwood, C. Wood, J. Vandersande, A. Zoltan (Pasadena, CA, U.S.A.), L. Danielson, V. Raag (Waltham, MA, U.S.A.) and D. Wittenberger (Cleveland, OH, U.S.A.)
The main types of phase diagrams for the rare-earth–X systems and their correlation with the periodic table 121
Z. Fuzhong (Inner Mongolia, China)

© Elsevier Sequoia/Printed in The Netherlands

CONTENTS *(continued)*

* Coercivity in rare earth magnets 133
J. D. Livingston (Schenectady, NY, U.S.A.)

* Recent developments in permanent magnet materials 133
K. S. Narasimhan (Pittsburgh, PA, U.S.A.)

* Preparation of elements and alloys 133
J. S. Abell, D. Fort and R. G. Jordan (Birmingham, U.K.)

* Microstructure and coercivity in high i*Hc* $Sm(Co,Cu,Fe,Zr)_{7.4}$ and Nd–Fe–B alloys: *in situ* observation of the heating process with a 1000 kV high-voltage electron microscope 134
P. Shuming and Z. Yaofu (Beijing, China)

* Effect of high temperature hydrofluorination on some metallic and semimetallic impurities in the rare earth metals 134
P. E. Palmer, B. J. Beaudry and K. A. Gschneidner, Jr. (Ames, IL, U.S.A.)

* Positron–electron penetration in rare earths 135
R. K. Batra, P. S. Takher (Ludhiana, India) and M. L. Sehgal (Aligarh, India)

* Ionic conductivity in $Na_2(R,Me)^{3+}M^{4+}P_3O_{12}$ crystals 135
K. Byrappa, (Mysore, India), A. B. Kulkarni (Karnataka, India) and G. S. Gopalakrishna (Mysore, India)

* Study of hydrogenation of $Gd_{64}Ga_{16}Ni_{20}$ by the XANES method 135
K. S. Jerath, H. S. Chauhan and K. B. Garg (Jaipur, India)

* Cerium: existing and future markets 136
P. G. Falconnet (Courbevoie, France)

* Solid solubility of La, Ce, Nd and Y and iron 136
Z. Fuzhong, G. Lijun, J. Kiuxing, L. Woyuan, Y. Yuxin and M. Lianghua (Inner Mongolia, China)

* Review and prospects of the application of rare earths in iron and steel in China 137
Y. Jing-Sheng and Y. Zong-Sen (Beijing, China)

* $R_2Fe_{14}B$ meterials: a new era in permanent magnets 137
J. F. Herbst (Warren, MI, U.S.A.)

* Structural properties of $R_{1+\epsilon}Fe_4B_4$ compounds 138
J. Allemand (Annecy-le-Vieux, France), D. Givord (Grenoble, France), J. Le Roy, J. M. Moreau (Annecy-le-Vieux, France) and P. Tenaud (Grenoble, France)

* Electronic structure calculation on rare earth iron boron intermetallic compounds 138
W. Y. Ching and Z. -Q. Gu (Kansas City, MO, U.S.A.)

2. LASERS IN RARE EARTH SPECTROSCOPY

A study of the energy transfer processes in sensitized gadolinium phosphors 139
G. Blasse, H. S. Kiliaan and A. J. De Vries (Utrecht, The Netherlands)

Luminescence of divalent europium crown complexes in various solvents and at various temperatures 147
G. Adachi, H. Fujikawa and J. Shiokawa (Osaka, Japan)

Kinetic study of the neodymium fluorescence and of the $Nd^{3+} \rightarrow Yb^{3+}$ energy transfer in lithium lanthanum metaphosphate-like glasses 155
C. Lurin, C. Parent, G. Le Flem and M. Couzi (Talence, France)

Intense blue luminescence spectra and lifetimes of Tm(3+) in $POCl_3$:$SnCl_4$ 161
J. Chrysochoos and A. H. Qusti (Toledo, OH, U.S.A.)

---

* Abstract of a paper presented at the 17th Rare Earth Research Conference, McMaster University, Hamilton, Ontario, Canada, June 9–12, 1986.

CONTENTS *(continued)*

Electronic relaxation of $^3P_0$ and $^1D_2$ states of Pr(3+) in $POCl_3$:$SnCl_4$ 169
J. Chrysochoos and A. H. Qusti (Toledo, OH, U.S.A.)

Cryogenic luminescence studies of YOCl:Eu with the YOF and PbFCl type structures 175
H. G. Brittain (New Brunswick, NJ, U.S.A.) and G. Meyer (Giessen, F.R.G.)

Fluoride glasses as optimized materials for lanthanide luminescence and energy storage in manganese(II) 181
C. K. Jørgensen, (Geneva, Switzerland), R. Reisfeld and M. Eyal (Jerusalem, Israel)

Comparison of laser properties of rare earths in oxide and fluoride glasses 187
R. Reisfeld, M. Eyal (Jerusalem, Israel), and C. K. Jørgensen (Geneva, Switzerland)

Time-resolved luminescence and decay characteristics of Gd^{3+} in fluoroarsenate and fluorophosphate glasses 195
J. Chrysochoos, (Toledo, OH, U.S.A.), B. Kumar and S. P. Sinha (Dayton, OH, U.S.A.)

Fluorescence dynamics in $LiYF_4$:Er^{3+} and $LiErF_4$ 203
A. Brenier, J. Rubin, R. Moncorge, C. Pedrini and G. Boulon (Villeurbanne, France)

Zinc sulphide thin films doped with rare earth ions 209
M. Tammenmaa, M. Leskelä, T. Koskinen and L. Niinistö (Espoo, Finland)

Site selectively excited luminescence of Eu^{3+} in gadolinium, yttrium and lutetium oxyorthosilicates 215
J. Hölsä (Espoo, Finland), K. Jyrkäs (Oulu, Finland) and M. Leskelä (Espoo and Oulu, Finland)

Excited-state properties of lamellar solids derived from hydrogen uranyl phosphate and lanthanon ions 221
C. M. Verschoor, M. M. Olken and A. B. Ellis (Madison, WI, U.S.A.)

Spectral studies of praseodymium(III) and thulium(III) in certain sulphate glasses 227
S. V. J. Lakshman and Y. C. Ratnakaram (Tirupati, India)

Interaction and intensity parameters for erbium(III) in certain acetate, nitrate and sulphate complexes 233
S. V. J. Lakshman and C. K. Jayasankar (Tirupati, India)

Phonon interference in the analysis of rare earth $4f^n$ energy level sequences 239
P. Caro (Meudon-Bellevue, France)

Intensities in the nine-coordinate *mer*-complexes of holmium(III) in aqueous solution. 247
S. A. Davis (Carlisle, PA, U.S.A.)

Dynamic ligand polarization contributions to $4f \rightarrow 4f$ magnetic dipole transition moments and rotatory strengths: $^7F_0 \rightarrow {}^5D_2$ and $^7F_2 \leftarrow {}^5D_0$ transitions in Eu(oxydiacetate)$_3^{3-}$ 251
M. T. Berry and F. S. Richardson (Charlottesville, VA, U.S.A.)

Spectral studies of Pr(III), Nd(III), Er(III) and Tm(III) ions in potassium zinc sulphate glass . 257
S. V. J. Lakshman and A. S. Kumar (Tirupati, India)

Magnetic splitting factors for Stark levels in neodymium oxychloride. 263
L. Beaury, J. Derouet, P. Porcher, P. Caro and P. G. Feldman (Meudon-Bellevue, France)

Intensity parametrization of the $LiYF_4/Eu^{3+}$ fluorescence spectrum. 271
C. Görller-Walrand, M. Behets (Heverlee, Belgium), P. Porcher (Meudon, France) and W. T. Carnall (Argonne, IL, U.S.A.)

Fluorescence line narrowing: a competitive technique to EPR 277
N. Pelletier-Allard and R. Pelletier (Orsay, France)

Analysis of the spectrum of Dy^{3+}:LaF_3 assuming a C_{2v} site symmetry 283
G. L. Goodman, W. T. Carnall (Argonne, IL, U.S.A.), R. S. Rana (Worcester, MA, U.S.A.), P. Vandevelde, L. Fluyt and C. Görller-Walrand (Heverlee, Belgium)

CONTENTS *(continued)*

Determination of cerium, europium and terbium in rare earth matrices by DCP–AES 291
K. Jyrkäs and M. Leskelä (Oulu, Finland)

* Electron trapping, trapped excitons and the stability of divalent rare earth ions in host crystals 297
D. S. McClure (Princeton, NJ, U.S.A.) B. Moine and C. Pedrini (Villeurbanne, France)

* Laser-excited europium(III) ion luminescence: sensitive and versatile probe of metal ion-biomolecule interactions 297
W. DeW. Horrocks, Jr., B. M. Cader, C. W. McNemar, B. C. Thompson and J. M. Tingey (University Park, PA, U.S.A.)

* Laser spectroscopy of excited state resonances of rare earth ions 298
R. S. Meltzer (Athens, GA, U.S.A.)

* The correlation of structural and optical properties of rare earth activated materials using optical hole burning spectroscopy 298
R. L. Cone (Bozeman, MT, U.S.A.)

* Recent advances in the dynamic and static spectroscopy of rare earth ions in insulators . . 299
W. M. Yen (Madison, WI, U.S.A.)

* Identification of the mechanism for phonon assisted energy transfer 299
J. C. Wright, J. R. Wietfeldt and B. M. Tissue (Madison, WI, U.S.A.)

* Effect of molar ratios of ligand to metal on the structure, luminescence and stability of aqueous lanthanide complexes with 2,6-dipicolinic acid 300
E. J. Parks, R. A. Faltynek, F. E. Brinckman (Gaithersburg, MD, U.S.A.) and J. Y. Peng (Rockville, MD, U.S.A.)

* Fluorescence studies of Am^{3+} in aqueous solution 301
J. V. Beitz, G. Jursich and J. C. Sullivan (Argonne, IL, U.S.A.)

* *Ab initio* calculation of crystal-field correlation effects in Pr^{3+}–Cl^- 301
B. Ng and D. J. Newman (Hong Kong)

* *Ab initio* calculation of intensity parameters 301
M. F. Reid, B. Ng and D. J. Newman (Hong Kong)

* Energy levels of Nd^{3+} and Eu^{3+} in zircon- and monazite-type structures 302
E. Antic-Fidancev, M. Lemaitre Blaise, C. K. Jayasankar and P. Porcher (Meudon-Bellevue, France)

* Electronic Raman scattering in $Ce^{3+}/LuPO_4$ 302
G. M. Williams, P. C. Becker, J. G. Conway, N. Edelstein (Berkeley, CA, U.S.A.), M. M. Abraham and L. A. Boatner (Oak Ridge, TN, U.S.A.)

* Electronic structure of $Sm(DBM)_3{\cdot}H_2O$ 302
C. E. Miller, R. A. Palmer (Durham, NC, U.S.A.) D. H. Metcalf, M. F. Reid and F. S. Richardson (Charlottesville, VA, U.S.A.)

* CPL of Sm(III): comparison of experimental and calculated emission (CPL and TL) spectra of $Na_3[Sm(ODA)_3]{\cdot}2NaClO_4{\cdot}6H_2O$ 303
R. C. Carter, D. H. Metcalf, C. E. Miller, R. A. Palmer (Charlottesville, VA, U.S.A.), P. S. May, M. F. Reid and F. S. Richardson (Durham, NC, U.S.A.)

* Electronic Raman scattering in rare earth phosphates 303
R. C. Leavitt and B. R. Judd (Baltimore, MD, U.S.A.)

* Optical signature of an incommensurate structure in the $ThCl_4$:Pr^{3+} system 303
J. C. Krupa (Orsay, France), R. C. Naik (Bombay, India) and P. Delamoye (Orsay, France)

* Abstract of a paper presented at the 17th Rare Earth Research Conference, McMaster University, Hamilton, Ontario, Canada, June 9–12, 1986.

CONTENTS *(continued)*

* Assignment of crystal field levels of erbium oxalate trihydrate 304
K. A. Schoene and F. S. Richardson (Charlottesville, VA, U.S.A.)

* Interpretation of the magnetochemical, EPR and NMR spectroscopic properties of adducts derived from tris(cyclopentadienyl)lanthanide(III) 304
H. D. Amberger, H. Reddmann and N. M. Edelstein (Berkeley, CA, U.S.A.)

* MCD of lanthanide diphthalocyanines 305
P. N. Schatz and T. C. van Cott (Charlottesville, VA, U.S.A.)

3. COORDINATION CHEMISTRY

Speciation of trivalent f elements in natural waters 307
G. R. Choppin (Tallahassee, FL, U.S.A.)

Complexation differences between lanthanide nitrates from spectroscopic measurements in water 315
H. B. Silber, F. Gaizer, T. Pham and M. Strozier (San Antonio, TX, U.S.A.)

Ultrasonic relaxation investigations of thorium nitrate in water 323
H. B. Silber (San Antonio, TX, U.S.A.)

Electron and energy transfer processes of excited states of europium(III) and terbium(III) aquo ions and cryptates. 329
N. Sabbatini, S. Perathoner, S. Dellonte, G. Lattanzi and V. Balzani (Bologna, Italy)

Preparation of ceric alkoxides in glycol ethers 335
P. S. Gradeff, F. G. Schreiber and H. Mauermann (New Brunswick, NJ, U.S.A.)

Effect of oligomerization on the solvent water proton longitudinal relaxation rates of lanthanide EDTA complexes. 339
H. G. Brittain, S. Mantha and M. F. Tweedle (New Brunswick, NJ, U.S.A.)

Comparison of lanthanide(III) and cadmium(II) as calcium(II) models: metal-ion induced conformational changes in spin-labeled calmodulin 343
J. M. Buccigross and D. J. Nelson (Worcester, MA, U.S.A.)

Precipitation incidence of the lanthanoid(III) hydroxides 351
Y. Suzuki, T. Nagayama, M. Sekine, A. Mizuno and K. Yamaguchi (Kawasaki, Japan)

An exploration of the function of rare earths in the dyeing of woollen yarn 357
H. Beidi and G. Gan (Beijing, China)

Terbium(III) and europium(III) ions as sensitive probes in organic photochemistry 363
G. W. Mushrush, W. M. Stalick, J. M. Watkins, Jr. (Fairfax, VA, U.S.A.) and M. L. Deanhardt (Greenwood, SC, U.S.A.)

Oxidation studies of selected lanthanides in acetonitrile 371
G. F. Payne and J. R. Peterson (Oak Ridge, TN, U.S.A.)

FT–IR investigation of the interaction between dimethylsulphoxide (DMSO) and some lanthanide nitrates in acetonitrile solutions. 379
J.-C. G. Bünzli and C. Mabillard (Lausanne, Switzerland)

Magnetic circularly polarized luminescence (MCPL) spectra of $EuCl_3$ and $Eu(NO_3)_3$ in solution 389
E. M. Stephens, D. R. Foster and F. S. Richardson (Charlottesville, VA, U.S.A.)

* Lanthanide(III)-aminopolycarboxylates: kinetic properties and ternary complexes 395
E. Brücher (Debrecen, Hungary)

---

* Abstract of a paper presented at the 17th Rare Earth Research Conference, McMaster University, Hamilton, Ontario, Canada, June 9–12, 1986.

CONTENTS *(continued)*

* Local density of f-element coordination compounds. 395
D. E. Ellis (Evanston, IL, U.S.A.)

* Lanthanide complexes of crown ethers, calixarenes and cyclodextrins: coordination versus inclusion 396
J. L. Atwood and S. G. Bott (University, AL, U.S.A.)

* Metal complex formation with 1,7-diaza-4,10,13-trioxacyclopentadecane-*N,N'*-diacetic acid 396
C. A. Chang and V. O. Ochaya (El Paso, TX, U.S.A.)

* Dissociation kinetics of 1,7,-diaza-4,10,13-trioxacyclopentadecane-*N,N'*-diacetic acid complexes of lanthanides 396
V. C. Sekhar and C. A. Chang (El Paso, TX, U.S.A.)

* Mixed ligand complexes of lanthanides with macrocyclic and open-chained polyaminopolycarboxylic acids and acetylacetone 397
C. A. Chang, B. S. Garg, V. K. Manchanda, V. O. Ochaya and V. C. Sekhar (El Paso, TX, U.S.A.)

* Solvent extraction studies of lanthanum(III) and nedymium(III) with ionizable macrocyclic ligands and thenoyltrifluoroacetone 398
V. K. Manchanda and C. A. Chang (El Paso, TX, U.S.A.)

* Use of cetyltrimethylammonium bromide in the solvent extraction of lanthanoid complexes of Bromopyrogallol Red and spectrophotometric determination of lanthanoids 398
S. Roy and S. P. Sangal (Nagpur, India)

* A comparison of the lanthanide-induced pseudocontact shifts in some seven, eight, and nine-coordinated lanthanide complexes 399
J. A. Peters (Delft, The Netherlands) and D. J. Raber (Tampa, FL, U.S.A.)

* Extraction of trivalent actinides and lanthanides by mixtures of HDDNS and crown ethers 399
D. D. Ensor, P. S. Reynolds and B. Zainal (Cookeville, TN, U.S.A.)

* Spectroscopic studies of the interaction of adriamycin with lanthanide(III) ions 400
M. T. Devlin and F. S. Richardson (Charlottesville, VA, U.S.A.)

* Formation of fluoro complexes of Tb^{3+} in hydrothermal solution at 200 °C and 100 bar . . . 400
B. A. Bilal and P. Langer (Berlin, F.R.G.)

* Solid state and solution structures of the lanthanide (2.2.1) cryptates 400
J. F. Desreux, P. P. Barthélemy, M.-R. Spirlet (Liège, Belgium) and J. Rebizant (Karlsruhe, F.R.G.)

* Direct evidence of three different metal-binding sites in α-lactalbumine 401
J.-C. G. Bünzli and J.-M. Pfefferle (Lausanne, Switzerland)

* Rare earth fluoride solubilities, complex formation and thermodynamic functions for the solution process 401
M. P. Menon, J. James and J. D. Jackson (Savannah, GA, U.S.A.)

* Lanthanide-molecular interactions in solution studied by FT-IR spectroscopy 402
S. A. Davis, C. A. Mirkin and M. Treichel (Carlisle, PA, U.S.A.)

* Anion influence on the solution optical activity (CPL) of europium nitrate and chloride complexes of chiral crown ethers 402
D. H. Metcalf, R. C. Carter, R. G. Ghirardelli, R. A. Palmer (Durham, NC, U.S.A.), M. F. Reid and F. S. Richardson (Charlottesville, VA, U.S.A.)

---

* Abstract of a paper presented at the 17th Rare Earth Research Conference, McMaster University, Hamilton, Ontario, Canada, June 9–12, 1986.

CONTENTS *(continued)*

*Syntheses and properties of the complexes of rare earths(III), bidentate heterocyclic amine ligands and trichloroacetic acid 403
D. Man (Zejiang, China)

*Lanthanide induced contact shifts – new values for $\langle S_z \rangle$ 403
A. A. Pinkerton, M. Rossier and S. Spiliadis (Lausanne, Switzerland)

*Chemical and *in vivo* characterization of gadolinium chelates. 404
M. F. Tweedle, G. Gaughan, P. Wedeking and H. G. Brittain (New Brunswick, NJ, U.S.A.)

*Lanthanide coordination chemistry: polypyrazolylborate and polyimidazolylborate complexes 404
R. A. Faltynek, E. J. Parks, F. E. Brinckman (Gaithersburg, MD, U.S.A.) and J. Y. Peng (Rockville, MD, U.S.A.)

4. ORGANOMETALLIC CHEMISTRY

Thermal stability studies of dicyclopentadienyl samarium acetate and halides 405
Y. Zhongwen, M. Huaizhu and Y. Yongfei (Anhui, China)

Synthesis and cyclic voltammetric study of bis(pentamethylcyclopentadienyl) neptunium dichloride. 411
D. C. Sonnenberger (Argonne, IL, U.S.A.) and J. Gaudiello (Lisle, IL, U.S.A.)

*Electron transfer chemistry of divalent ytterbium metallocenes 415
R. A. Andersen (Berkeley, CA, U.S.A.)

*Synthesis and reactivity of divalent organosamarium complexes 415
W. J. Evans (Irvine, CA, U.S.A.)

*Lanthanoid metals in unusual coordination environments: implications for organic, organometallic and inorganic chemistry 416
A. L. Wayda (Murray Hill, NJ, U.S.A.), R. D. Rogers (De Kalb, IL, U.S.A.), M. P. Andrews, I. Mukerji, S. H. Bertz and G. Dabbagh (Murray Hill, NJ, U.S.A.)

*The electronic structure of organoactinide complexes containing metal–metal bonds 416
B. E. Bursten (Columbus, OH, U.S.A.)

*Isomerization of tungstaenolate produced by the insertion of $W(CO)_6$ into a uranium–carbon multiple bond 416
R. E. Cramer, J. H. Jeong and J. W. Gilje (Honolulu, HI, U.S.A.)

*Recent developments in organothorium and organouranium chemistry 417
A. P. Sattelberger, R. R. Ryan and T. M. Gilbert (Los Alamos, NM, U.S.A.)

*Synthesis and disproportionation of mixed ligand ytterbium organometallics involving cyclopentadienyl and β-diketonato chelate ligands. 417
M. Huaizhu and Y. Zhongwen (Anhui, China)

*Synthesis of dicyclopentadienyl ytterbium benzoate derivatives 418
S. Furan and Y. Zhongwen (Anhui, China)

*Synthesis of bis(dicyclopentadienyl ytterbium) dicarboxylates 418
W. Xiuran, D. B. Hui and W. Z. Thi (Anhui, China)

*Divalent lanthanoid synthesis in liquid ammonia: III the synthesis and X-ray crystal structure of $(C_8H_8)Yb(C_5H_5N)_3 \cdot \frac{1}{2}C_5H_5N$ 418
R. D. Rogers (De Kalb, IL, U.S.A.), A. L. Wayda, I. Mukerji (Murray Hill, NJ, U.S.A.) and J. L. Dye (East Lansing, MI, U.S.A.)

---

*Abstract of a paper presented at the 17th Rare Earth Research Conference, McMaster University, Hamilton, Ontario, Canada, June 9–12, 1986.

CONTENTS *(continued)*

* Luminescence studies of adduct formation between $Tb[N(SiMe_3)_2]_3$ and various organic substrates. 419
H. G. Brittain (East Orange, NJ, U.S.A.), A. L. Wayda and I. Mukerji (Murray Hill, NJ, U.S.A.)
